

METAL FINISHES

STANDARD METAL FINISHES

The process of our standard metal finishing begins with the selection and preparation of the base metal. This process is then followed by satin finishing, polishing, plating, or patina application. These surface finishes are then protected with a clear lacquer of either Gloss or Matte finish, not recommended for exterior applications. For standard metal

finishes which require exterior application, ALM recommends a clear gloss or matte polyester powder coat. Typically stainless steel is left unprotected and is suitable for exterior applications. Finish samples available upon request.

Finish	Option	Colour Swatch
Polished Aluminum	AP	
Satin Aluminum	AS	
Clear Anodized Aluminum	AC	
Black Anodized Aluminum	AB	
Polished Brass	BP	
Satin Brass	BS	
Antique Brass	BA	
Polished Chrome	CP	
Satin Chrome	CS	
Polished Nickel	NP	
Satin Nickel	NS	
Satin Stainless Steel	SS	

METAL FINISHES

POWDER COATED FINISHES

ALM Architectural Lighting's polyester powder coating option provides a cost effective, durable, low maintenance, and abrasion resistant finish for interior and exterior applications. ALM offers (2) types of powder coated finishes: **bonded metallic powder coat** and **interior/exterior powder coat**. Finishes other than what are

offered as our standard colors can be specified by providing ALM with a RAL number, paint manufacturer's color number, or simply furnishing a sample for us to match. See www.tigerdrylac.com for more information on the powder coating process, color effects and specifications.

Bonded Metallic Powder coated finishes (interior only):

Our closest powder coat match to standard metal finishes. In this process, the metallic pigments are bonded to the base paint, allowing an even distribution of pigments throughout the medium for a more uniform metallic finish. Finish samples available upon request.

Finish	Option	Colour Swatch
Silver Metallic	PS	
Gray Metallic	PG	
Brass Metallic	PB	
Bronze Metallic	PZ	
Copper Metallic	PC	

Interior/Exterior Powder Coated finishes:

An excellent weather and UV resistant polyester coating for exterior and interior applications.

Finish	Option	Colour Swatch
Gloss White, RAL Eq. #9003	GW	
Gloss Black, RAL Eq. #9004	GB	
Gloss Silver, RAL Eq. #7040	GS	
Gloss Gold, RAL Eq. #8000	GG
