

TOOLS FOR LIGHTING

whitegoods

FILIX

IP44

inter-lux.com Inter-lux is a member of a group of lighting manufacturers dedicated to bringing high design and high-quality products to international projects. Our partners are accredited and capable of supplying high-quality lighting solutions to any country in the world. All Inter-lux manufacturers are CUL or CETL certified to produce products compliant with US and Canadian standards. The products come assembled and labeled from the factory to be direct shipped to the jobsite anywhere in the world.

Schmitz Lighting products provide innovative lighting solutions for commercial and private use. Their products are distinguished by their functional design combined with pure aesthetic lines and a high standard of quality materials.

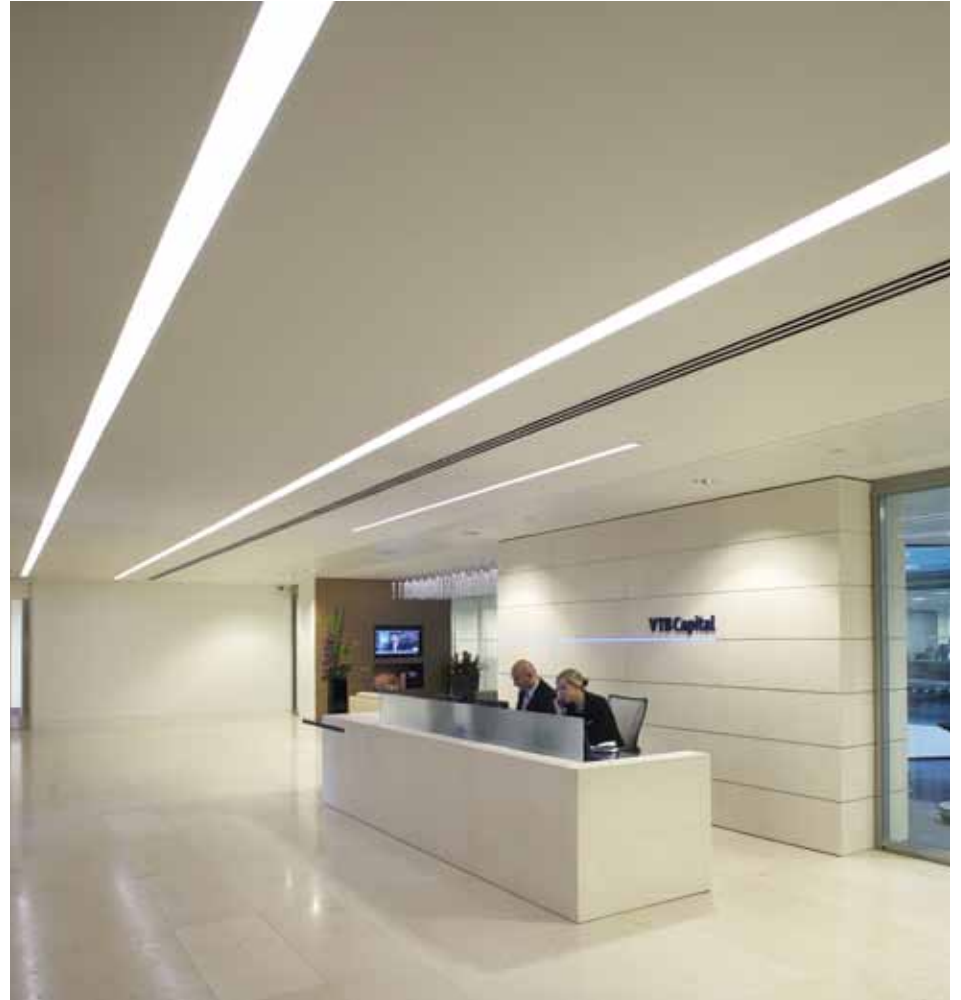

ALM products are used in large public spaces, offices and hotels where a well-proportioned luminaire is needed to illuminate the space. In addition to the standard range, modified and custom solutions are also available.

whitegoods

Whitegoods produces a complete range of integrated architectural lighting tools. Logical, modular systems and families of products with absolute reduction of detail offer seamless architectural integration. Whitegoods allows the discriminating designer to utilize a singular vocabulary throughout the project. All luminaires are available with bezel or plaster-in trim.

FILIX

Filix is the source for exceptional white color and RGB color LED linear lines of light, and facade lighting found in indoor and outdoor applications. A range of mounting systems and standard products offer the ability to specify flush in-the-ground or wall products, surface-mounted systems as well as field-bendable, underwater-rated continuous LED products.

Steng Lighting systems combine advanced technology with ease of use and prominent design. They are renowned for their original modular design system which allows lights to be changed easily through an innovative plug-in socket connection featured in nearly all Steng lights.

IP44

IP44 produces aesthetically and technically sophisticated exterior lighting by hand in Germany. Each fixture is designed to withstand the elements, while achieving brilliant light qualities in halogen, metal halide and fluorescent. IP44 provides beautiful exterior lighting, which decorate and illuminate gardens, facades and entrance areas.
