Warranty

Use the enclosed assembly instructions for the installation of the lighting fixture. Non-compliance with the assembly instruction will automatically void the warranty.

The persons assigned with the installation of the product are instructed to handle it with the utmost care and safety in order to avoid damages to third parties.

The present light fixture has been tested and is fully operational.

Delivery contains 1 package

Unpack the light fixture and check completeness according to list of items. Use for installation enclosed cloth gloves to prevent soiling of polished frame, screws and acrylic-ring.

1. Connecting the supply line

Mark the anchor positions for the assembly bracket 1 next to the supply line and drill using a .25" (6 mm) drill, insert wall plugs.

Mount the assembly bracket 1 and connect the supply line to the mounted terminal.

2. Adjusting the tilt angle of the light fixture

Depending on its use, the tilt angle of the light fixture ring can be adjusted as desired.

The three lower suspensions can thereby be adjusted so that the length is the same or different, which changes the tilt angle with the aid of the cable support 4 .

Position the 3 cables vertically and lock them in place on the cable support 2 in the ceiling plate 3 with screws.

As soon as the light fixture has been put in the desired position, lock the screws on the cable support 4 again.
