

Luminaires must be installed by a qualified electrician. Check with local and national codes for proper installation.

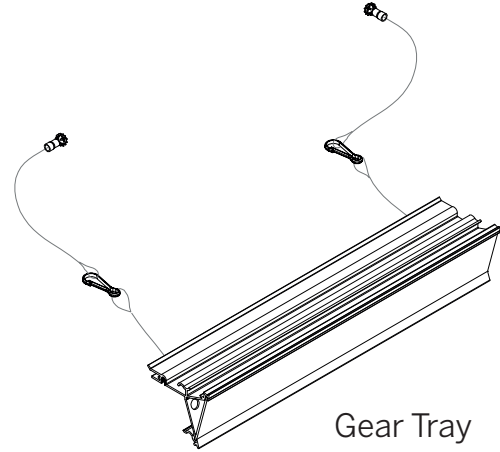

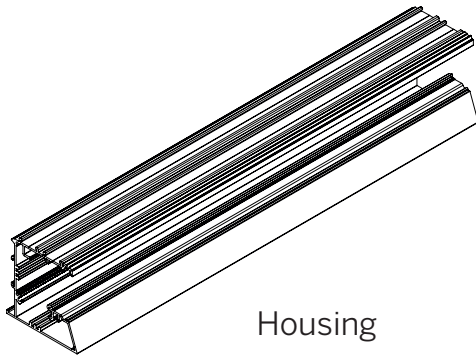

To prevent electrical shock disconnect electrical supply before installation or servicing.
Never connect a live fixture!!!

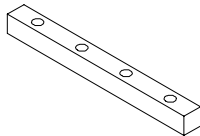

Contractor is responsible for adequately reinforcing walls and/or ceilings to support fixture weight. Provide blocking when necessary.

Step 1 - **Open the Box**

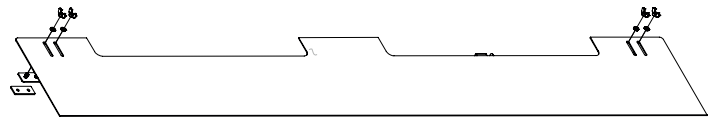

Unpack luminaire unit. Unit is comprised of:

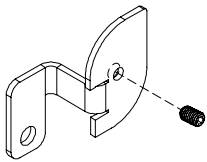

(LED board, Driver, and Safety Cables pre-installed at factory)

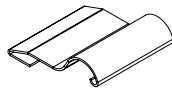

Alignment Pin
(Multi-Unit Run only)

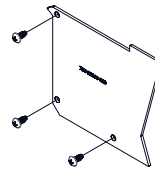

Infill Panel Kit
(Optional)

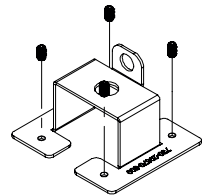

Grid Brackets

Mounting Clips
(4) per Fixture

End Cap Kit (2)
(Multi-Unit Run only)

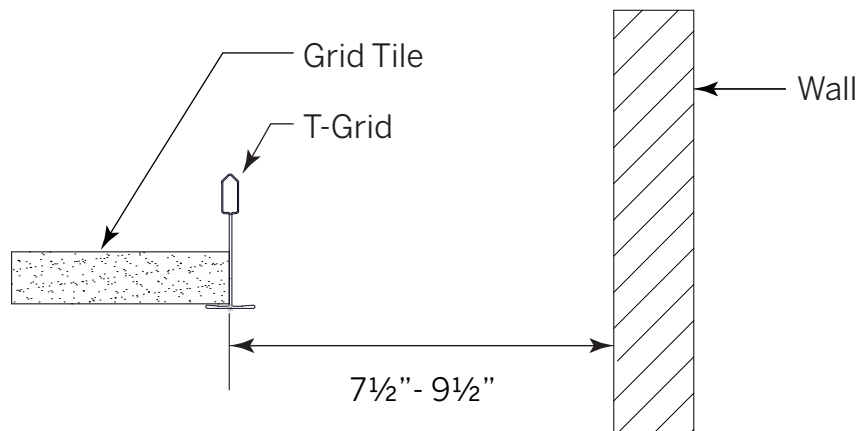

Hanging Brackets

Infill Panels, End Caps, Hanging Brackets, and Grid Brackets are supplied with mounting screws.

Step 2 - **Ceiling Prep**

If your order includes the factory-supplied Infill Panel, construct ceiling grid such that there is a 7½" - 9½" space between center line of grid and wall. Dimensional range due to adjustable depth of Infill Panel. See **Step 6** for more details.

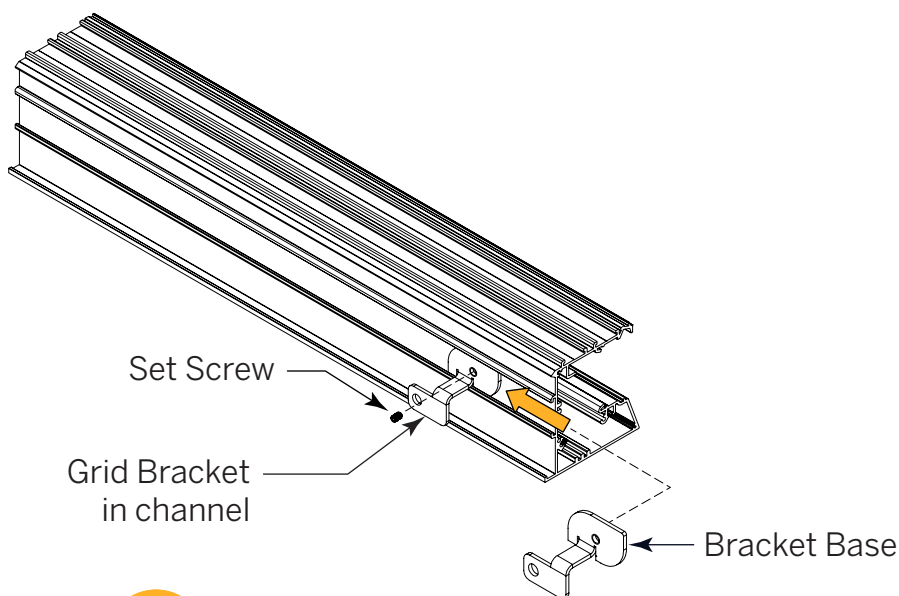

Step 3 - **Installation of Grid Brackets**

- a** Secure Grid Brackets on Housing by sliding base along major channel on back of extrusion.
- b** Fasten to Housing with supplied **M4 Hex** Set Screw, as shown.

Repeat as necessary.

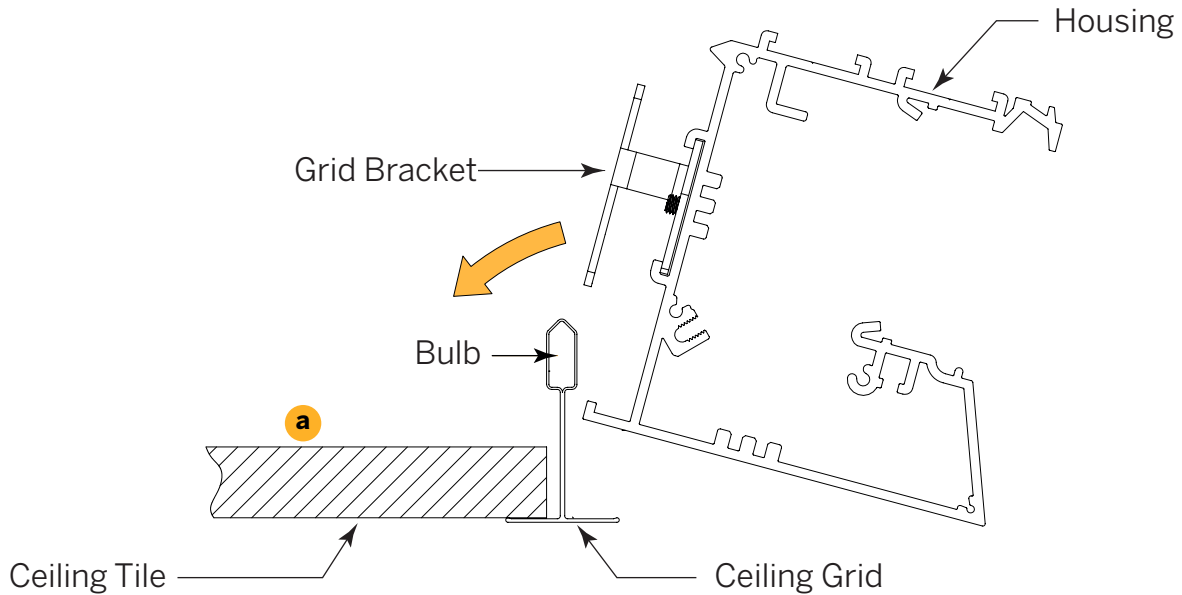

See **Step 4** for side view of installed Grid Bracket

Step 5 - **Install End Cap/Start of Run**

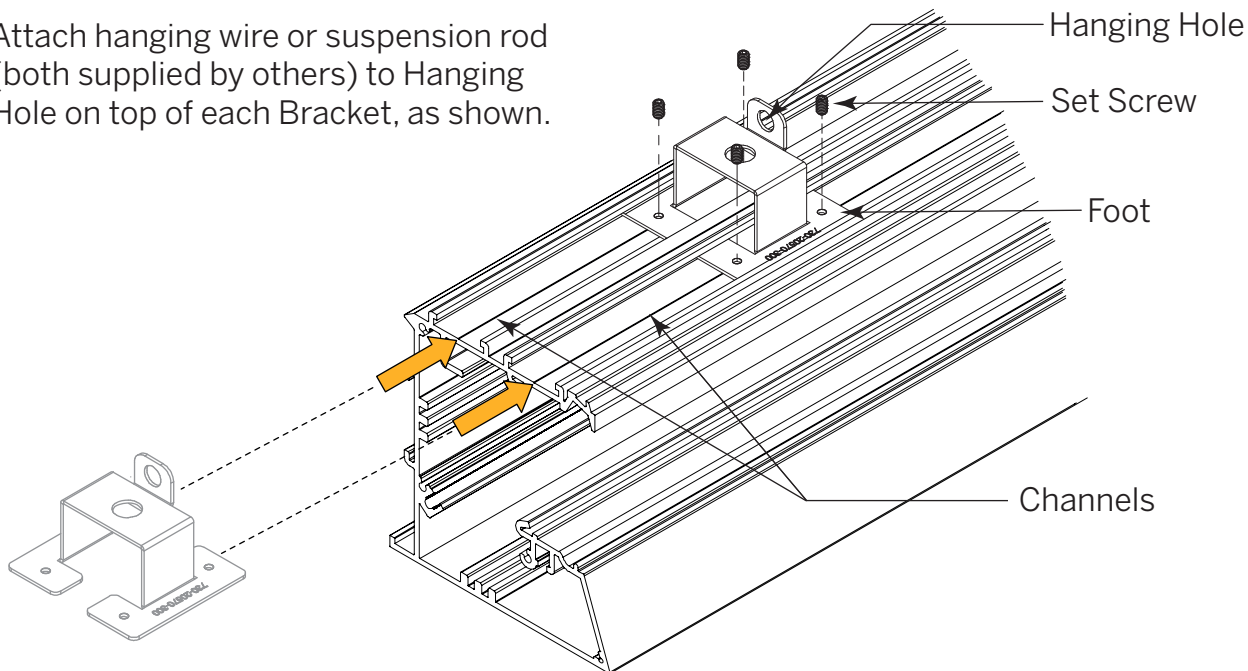

If your order is for **Stand-Alone** fixtures, End Caps are pre-installed at factory.

If your order is for a **Multi-Unit run**, install End Cap on first unit at beginning of run and last unit at end of run, using supplied #4-40 Phillips head screws.

Step 6 - **Installation of Hanging Brackets**

- a** If required to attach fixtures to ceiling structure, slide Hanging Brackets into Housing's top double channel such that they capture the Brackets' two "feet."
- b** Secure Brackets with supplied **M3 Hex Set Screws**.
- c** Attach hanging wire or suspension rod (both supplied by others) to Hanging Hole on top of each Bracket, as shown.

Step 7 - **Installation of Alignment Pins**

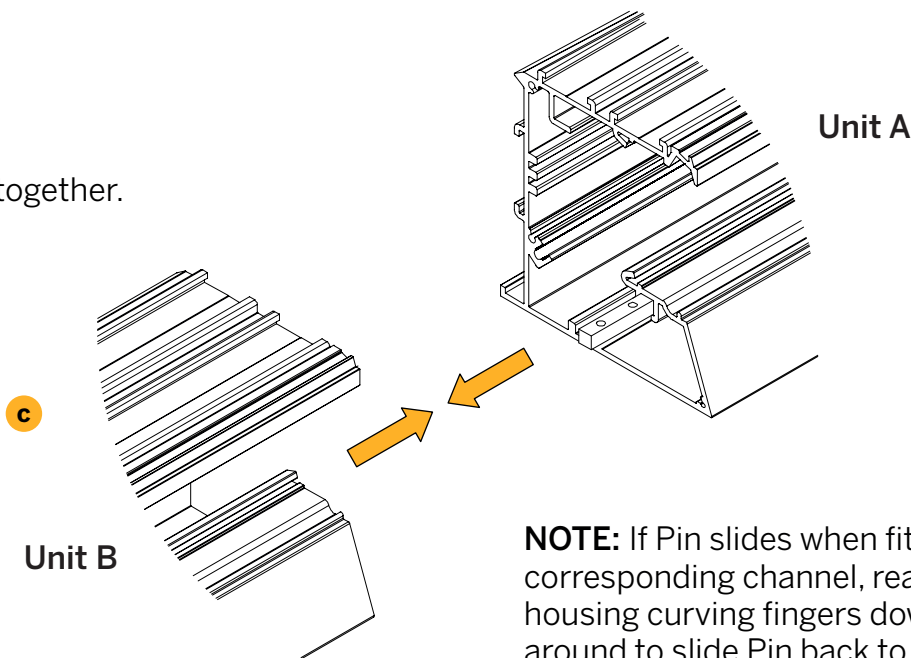

If your order consists of **Stand-Alone** fixtures and includes Infill Panels skip to **Step 6**. If not, skip to **Step 7**.

If your order consists of a **Multiple Unit Run**:

- a** Slide Alignment Pin halfway into square channel of Unit A, as shown below and at right.

- b** Draw Unit A and Unit B together. Fit Alignment Pin into corresponding channel in Unit B.

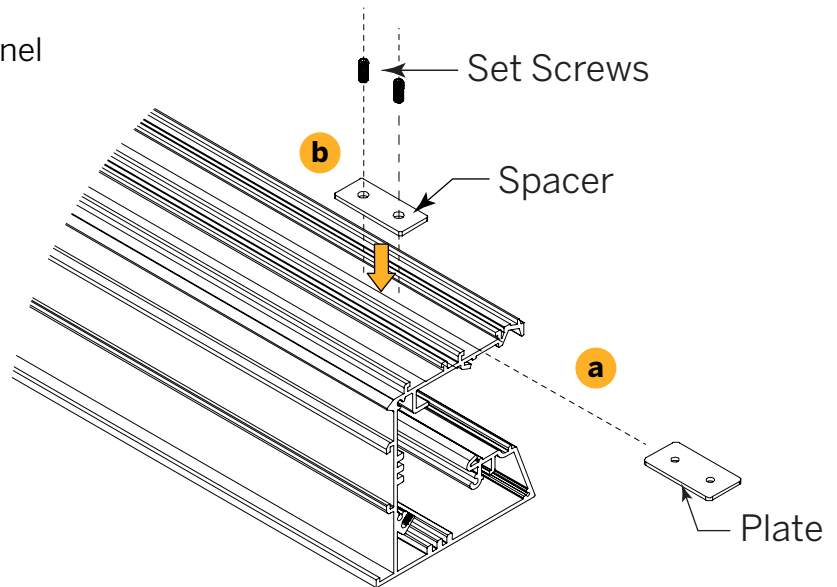

NOTE: If Pin slides when fitting into corresponding channel, reach into housing curving fingers down and around to slide Pin back to center between the two units.

Step 8 - **Installation of Infill Panel**

If your order includes an Infill Panel,

- a** Slide Z Cove Plate through front channel on top of Housing.
- b** Place Z Cove Spacer on top of Plate. Fasten together with supplied **M4 Flat Head Set Screws**.

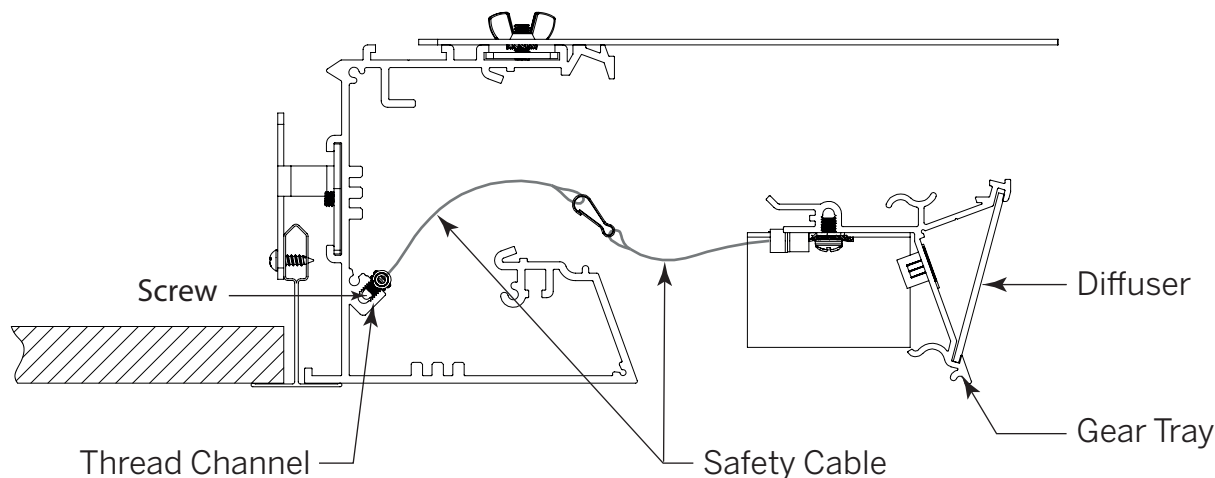

- c** Lower Infill Panel onto top of Housing such that Set Screws pass through slots in Panel.
- d** Fasten with Wing Nuts and Lock Washers.

Step 9 - **Installation of Safety Cable**

The factory attaches the two-part Safety Cable to the Gear Tray. The free end with screw is now fastened to the Thread Channel in Housing, as shown below.

Step 10 - **Wiring**

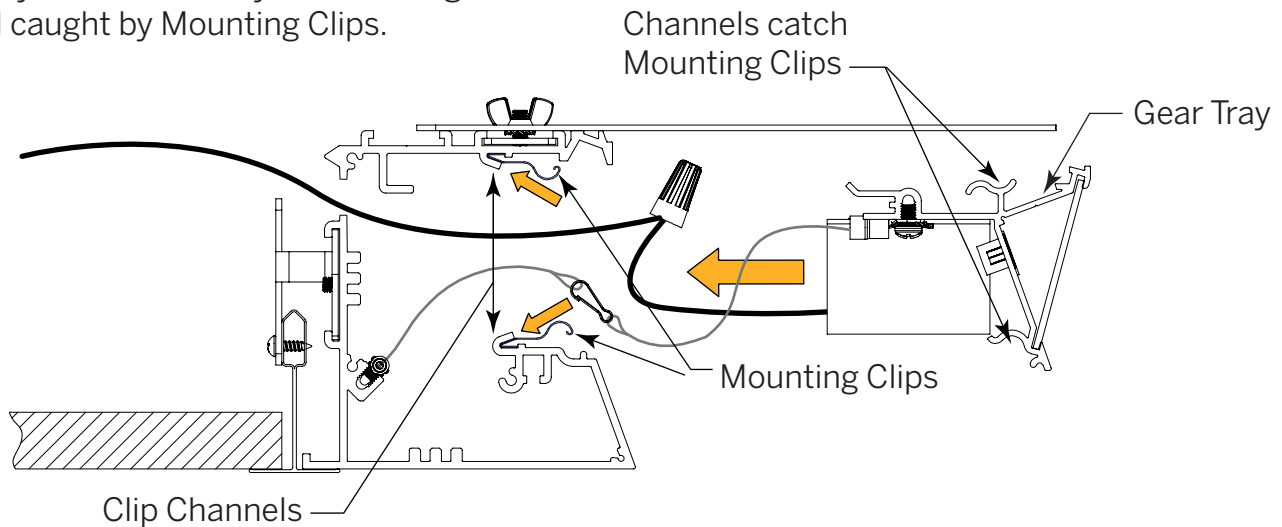

- a** Pull Power (and Control) Feed wires through holes in Housing.
- b** Connect wires from Driver to Power Feed. A 7/8" hole is drilled in Housing at start of run.

Step 11 - **Installation of Gear Tray**

- a** Push Mounting Clips into Housing - see small arrows below.
(half of supplied quantity above, half below).
- b** Gently insert Gear Tray into Housing until caught by Mounting Clips.
