IMPORTANT: Fixture(s) must be wired in series! Refer to driver wiring document

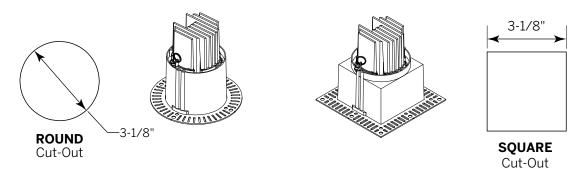

Luminaires must be installed by a qualified electrician. Check with local and national codes for proper installation.

To prevent electrical shock disconnect electrical supply before installation or servicing.

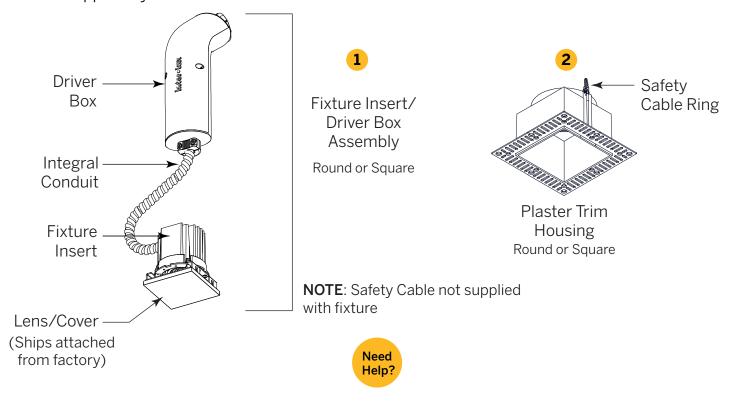

Never connect a live fixture!!!

Contractor is responsible for adequately reinforcing walls and/or ceilings to support fixture weight. Provide blocking when necessary.

Step 1 - Confirm Power Supply is Off!

Unpack luminaire unit. Unit ships in *two* major parts: Fixture Insert/Driver Box Assembly and Plaster Trim Housing unless Remote Driver version was supplied, then Plenum-rated cable with bare leads is also provided. In this configuration, integral conduit and driver box are not included. However, a strain relief is added to where the low voltage wires exit. Remote drivers and housings are supplied by Inter-lux.

Step 2 - Ceiling Preparation

Cut appropriate size opening in the ceiling as shown above. Clear any insulation at least 3" from any part of the fixture or driver enclosure.

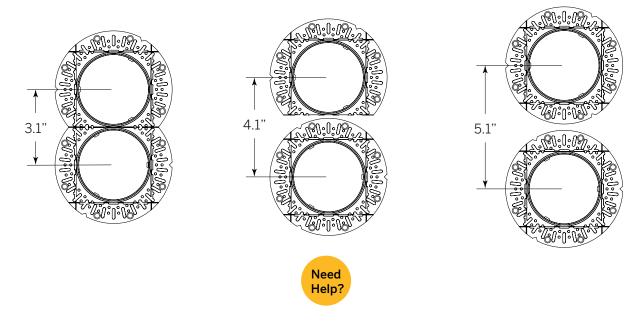

Step 3 - Insert Housing

- **a** Screw housing into ceiling blocking or structure.
- **b** Pull power and control cables out through housing.
- For multiple luminaire configuration, see below:

Plaster Trim may be broken on vertical and horizontal score marks to enable tighter arrangements.

Indent notches around perimenter may be used to calculate center marking distances

Step 4 - Apply Joint Compound

Apply joint compound onto plaster trim frame using tape-and-joint technique. Joint compound should be flush with inside edge of housing. Clean excess while still wet.

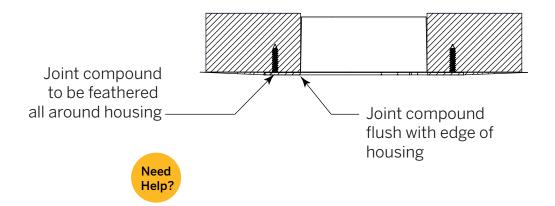

NOTE: Illustrations show conduit exiting from ceiling. This may not be the case in your installation.

Step 5 - Wiring

- a Locate Fixture Insert/Driver Box assembly.
- Priver Box Cover.
 Loosen Cable Strain Relief
 Bracket(s) and Hex Screws.
 Remove (unscrew)
 Knock-outs as necessary.

Connect the Power Feed Cable to the Black (L), White (N) and Green (Gnd) Terminals. Connect the Control Wires, if applicable.

Step 5 - Wiring (continued)

To connect to driver box, incoming conduit must be Trade Size 3/8

However, this size conduit cannot enter driver box. It is held in place by Cable Strain Relief Bracket only. If Romex is used, fasten set screws to secure in addition to closing strain relief bracket.

Use 7/64" allen key to fix set screws.

Refer to Driver Wiring Instructions for other control protocols

Step 6 - Latching Fixture Insert & Lens/Cover inside of Housing

- a Place driver box and integral conduit into ceiling hole.
- Push Fixture Insert into Housing in ceiling. A click will be heard when Insert is properly seated.

 IMPORTANT: Be careful not to damage LED or Optic during installation process.

- c Check to make sure that all push latches are open before inserting
- d Push insert into housing until hearing a click
