Installation Instructions

Downlight

Round and Square
Wall Wash
Recessed Plaster Trim

IMPORTANT: Fixture(s) must be wired in series! Refer to driver wiring document

Luminaires must be installed by a qualified electrician. Check with local and national codes for proper installation.

To prevent electrical shock disconnect electrical supply before installation or servicing.
Never connect a live fixture!!!

Contractor is responsible for adequately reinforcing walls and/or ceilings to support fixture weight. Provide blocking when necessary.

Step 1 - Confirm Power Supply is Off!

Unpack luminaire unit. Unit ships in **three** major parts: Fixture Insert/Driver Box Assembly, Plaster Trim Housing, and Lens/Cover unless Remote Driver version was supplied, then Plenum-rated cable with bare leads is also provided. In this configuration, integral conduit and driver box are not included. However, a strain relief is added to where the low voltage wires exit. Remote drivers and housings are supplied by Inter-lux.

Step 2 - Ceiling Preparation

Cut appropriate size opening in the ceiling as shown above. Clear any insulation at least 3" from any part of the fixture or driver enclosure.

Step 3 - Insert Housing

- a** Screw frame into ceiling blocking or structure.
- b** Pull power and control cables out through housing.
- *** For multiple luminaire configuration, see below:

Plaster Trim may be broken on vertical and horizontal score marks to enable tighter arrangements.

Indent notches around perimeter may be used to calculate center marking distances

Step 4 - Apply Joint Compound

Apply joint compound onto plaster trim frame using tape-and-joint technique. Joint compound should be flush with inside edge of housing. Clean excess while still wet.

NOTE: Illustrations show conduit exiting from ceiling. This may not be the case in your installation.

Step 5 - Wiring

- a** Locate Fixture Insert/Driver Box assembly.
- b** Remove Driver Box Cover. Loosen Cable Strain Relief Bracket(s) and Hex Screws. Remove (unscrew) Knock-outs as necessary.

NOTE: Illustrations show conduit exiting from ceiling. This may not be the case in your installation.

- c** Connect the Power Feed Cable to the Black (L), White (N) and Green (Gnd) Terminals. Connect the Control Wires, if applicable.

Step 5 - Wiring (continued)

Driver Box
Connected to
Conduit

Driver Box
Connected to
Romex

Interior View
of Driver Box

To connect to driver box,
incoming conduit
must be Trade Size 3/8

However, this size conduit
cannot enter driver box.
It is held in place by Cable Strain
Relief Bracket only.

If Romex is used, fasten
set screws to secure
in addition to closing strain
relief bracket.

Use 7/64" allen key to fix set screws.

Refer to Driver Wiring Instructions
for other control protocols

Step 6 - Orienting Wall Wash Lens Cover

Step 7 - Mounting Fixture Insert inside Housing

- a** Place Driver Box and Integral Conduit inside ceiling hole
- b** Push Fixture Insert into Housing in ceiling. A click will be heard when Insert is properly seated.

IMPORTANT: Be careful not to damage LED or Optic during installation process.
