exterior linear range

Performance for every need

Each family of lights includes different outputs to meet the largest possible range of requirements. Paseo, Xenia, Archiline and Archiline PRO offer a particularly wide selection.

Optical range

The Linear Lights series offers specific products for every context, and lighting solutions that vary depending on the optics you choose. There are spots, narrow spots for small or very small angles, various floods, and diffuse and wall washer lights. The Elliptic 20°x50° gives an oval grazing wash for tall narrow walls, and Asymmetric provides a directional beam that washes the wall evenly.

Archiline_W Pro

ARCHILINE_F trimless with extra-clear 0.5-inch tempered glass and black screenprinted optical compartment, with or without darklight +RGBW. Designed for wall lighting, and can be placed in continuous lines.

ARCHILINE_FL trimless with extra-clear 0.5-inch tempered glass and white ceramic varnish, monochrome or RGBW versions. Designed for path marking in parks, squares, drives, and public spaces. Can be placed in continuous lines.

ARCHILINE_A 6060 aluminum alloy flange with extra-clear 0.5-inch tempered glass and black-screenprinted optical compartment, with or without darklight +RGBW. Designed for wall lighting.

ARCHILINE_I AISI 316L stainless steel flange with extra-clear 0.5-inch tempered glass and black-screenprinted optical compartment, with or without darklight +RGBW. Designed for wall lighting.

ARCHILINE_I Pro recessed with stainless steel frame (AISI 316L) comes with Dark Light glare control system incorporated and allows for an unprecedented 160' illumination of facades. PRO is available also in RGBW with a Quad-Chip LED that blends colors seamlessly while pushing light up to new limit for such fixtures.

ARCHILINE_W The surface mount and wall mount is made from 6060 aluminum extrusion with 10-micron anodized protective finish. The adjustable brackets are made from graduated stainless steel. Features maximum glare control and multiple optics

ARCHILINE_W Pro Wall mounted comes with Dark Light glare control system incorporated and allows for an unprecedented 160' illumination of facades. PRO is available also in RGBW with a Quad-Chip LED that blends colors seamlessly while pushing light up to new limit for such fixtures.

High-quality construction

Archiline bodies are made from extruded 6060 aluminum alloy Anodized to 10 microns.

These two processes provide superior passive heat dissipation and, most importantly, higher corrosion resistance.

The caps are diecast.

IP67

Safety systems

We have developed a variety of corrosion protection technology to maximize the lifespan of our lights.

They also have overtension and electrical discharge protection, TCS® to shield their circuits from moisture, and AquaStop® water protection.

The perfect mix

Combined-optic RGBW technology makes color mixing better and more uniform. This takes place within the optics, using treated lenses optimized for maximum efficiency and high-performance RGBW LEDs. One diode combines pure warm or natural white and red, green and blue, mixing the colors better than traditional systems and creating an infinite variety of shades, as well as obtaining pure mwhite without the influence of the RGB. The optical compartment is screenprinted in black, with darklight screening giving perfect control over glare, sectioning the beam to eliminate the direct outward component and lighting only the wall.

Optics

The Archiline range has optics for every type of design need.

SPOT and NARROW SPOT for accent lighting

FLOOD and MEDIUM FLOOD for soft lighting of parts of walls

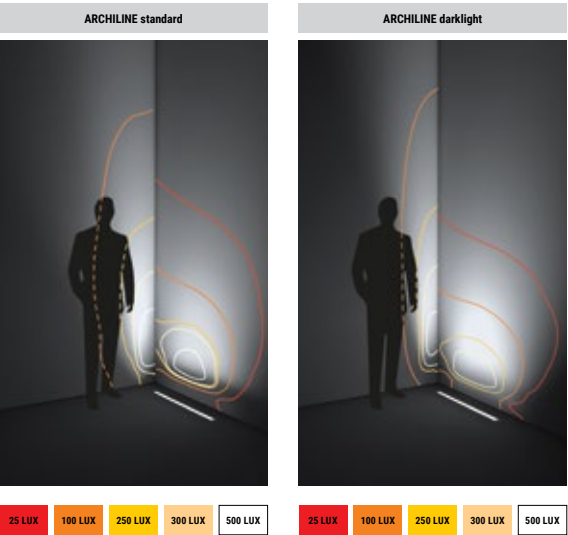

ELLIPTIC 20°x50°, which projects an oval beam, ideal for grazing illumination of high and narrow walls

ASYMMETRIC for a wallwasher effect.

Other features:

Darklight versions, which section the beam by eliminating the direct component to the exterior and lighting only the wall.

Ability to create continuous lines without affecting the evenness of the light near the ends of each module. In the Archiline_F no-darklight versions, the diodes are arranged so as to maintain the same distance between each one, and between the last ones at each end.

College Place d'Armes | Yverdon-les-Bains, Switzerland

Xenia

The Xenia family comprises a very wide range of linear lights, with numerous configurations for every lighting need. They provide a high-performance solution for lighting professionals, offering reliable safety technology including OVP, ESD, TCS® and AquaStop®. There is also a wide choice of topLED and powerLED outputs, and optics. The range is available in warm white, natural white, and RGBW versions.

High-quality construction

Xenia is made from very high-quality materials and components. Because of the ways in which they are used, these lights must be durable and able to maintain their performance in temperatures ranging from a glacial -20°C to a sultry +60°C. They are also highly corrosion resistant, thanks to their use of 6060 aluminum alloy and 10-micron anodization.

Safety systems

We have developed a variety of corrosion protection technology to maximize the lifespan of our lights. They also have overtension and electrical discharge protection, TCS® to protect their circuits from moisture.

Wall-mounted versions

- Multiple fixing sizes for made-to measure grazing installations
- Graduated body rotation
- Anti-glare shield
- Five sizes, from 14.2 to 59.1 inch
- Optics: Flood, Narrow Flood , Wide Flood, Asymmetric, General

Recessed versions

- Extra-thin housing: frame only 0.1 inch □
- Housing has no end caps, so multiple lights can be positioned in series to create continuous lines.
- The end cap can then be placed at the end of the run and adapted to the housing so that the whole of the body is enclosed.
- Five sizes, from 14.2 to 59.1 inch
- Optics: Flood, Narrow Flood, Wide Flood, Asymmetric, General

Paseo

Paseo_L General

Paseo_L Anti-glare

Paseo_L RGBW

Paseo_X

Paseo_RGBW

Paseo is a highly functional and versatile range of lights. Paseo_L, with a topLED source and antiglare and RGBW versions, is designed for architectural illumination. It has a range of optics, from flood to asymmetric and diffuse. Paseo_X has a powerLED source for high-output illumination, and and is available with flood, medium flood, asymmetric, elliptic and diffuse optics and a wide selection of control options in the standard and RGBW versions.

IP67

Agemar | Athens, Greece

Integral Driver	120V On/Off	120V On/Off	-	120V On/Off 120V + 0-10V	120V + DMX

Minimal size

The new Paseo models are even thinner and more versatile, with heights of 0.9 to 1.5 inch that adapt easily to any design need. Their very small size is combined with simple, minimalist aesthetics.

The Paseo range comes with a wide choice of optics, lengths, color temperatures, and controls. These include 0-10V, and RGBW DMX and RGB pixel for dynamic lighting management and spectacular architectural illumination. The housings and numerous accessories mean Paseo can be recessed or fitted to a wall, ceiling or floor.

Maximum protection

An electrostatic discharge occurs when there's a transfer of charges between two bodies that are close or in contact with each other. This often damages electronics and LED modules. Paseo fixtures with integral drivers come with an up to 4KV electrostatic discharge (ESD) protection.

Ultrasonic-welded caps offer perfect mechanical resistance and light continuity

Thermoplastic PUR cables with IP67 4 pin or 5-pin M12 quick-connectors

Steel spring clips allow you to easily install the Paseo profile into the outer casing

TCS® valve, to avoid the formation of humidity in the profile 4KV electrostatic discharge (ESD) protection.

Intake

The Intake linear path marker is available with two optics, diffuse and asymmetric. The first highlights obstacles and illuminates specific areas, while the second brings out the depth of the walkable area or lighted object, and is perfect for footpaths, parking areas, and low walls.

IP66

range

Dirigo

The Dirigo series is a new lighting concept for outdoor spaces. Available as single elements or modules to create continuous lines, it is a ground profile designed to illuminate walkways and other foot traffic areas, and be placed along paths and walls to mark out routes. It can be safely walked on, and its distinctive and award-winning design features a hidden light source that creates controlled, ground-hugging and glare-free illumination.

316L Stainless steel or aluminum construction with black, gray or cor-ten like finish standard.

Dirigo

Grazing light

The internal Led source gradient was studied for the best lighting distribution, along the pathways.

Range

Dirigo is available as single module or prepared for continuous line installation.

Single module (L. 39.4 inch)

Sealed and complete source profile, end caps.

Continuous LED installation modules

Continuous LED strips up to 14 feet. Feeds from either end allow for 28 feet of continuous strips. Minimal light interruption when joining multiple units greater than 28 feet. Mechanical connection between profiles. Remote Driver 24VDC.

Complete element version

System

**Dirigo Profiles are not field cuttable. For any cut lengths, please consult the factory.

Robust design

The opposing level structure of Dirigo's single profile makes this appliance particularly sturdy and resistant. The absence of raw edges makes it ideal for public and private outdoor applications. Dirigo can be walked on and is extremely safe for users.

Ice-Cut66

Extremely slender at only 0.4 inch □, lightweight, and easy to install in any space, Ice-Cut66 can be used to create segmented light scenes or continuous lines, thanks to the cables exiting at the bottom of the light. This smart solution produces perfectly distributed intensity along the length of the light.

IP66
