

# SUELO

 **linea  
light**  
i-LÈD

A modern outdoor deck at night. The deck is made of dark wood planks and features several recessed circular floor lights. A large, light-colored concrete pillar stands on the right. In the background, there is a wooden slat wall and a view of a lake under a dark blue sky. The overall atmosphere is sophisticated and minimalist.

**SUELO, DESIGN  
AND INSTALLATION,  
EVERYTHING JUST  
GOT SIMPLER**

**VAST RANGE**

Suelo is a family of recessed luminaires that includes a broad selection of specialty optics in multiple sizes and outputs which makes it possible to find the perfect solution for almost any outdoor application

# RECESSED UPLIGHTS

### The range

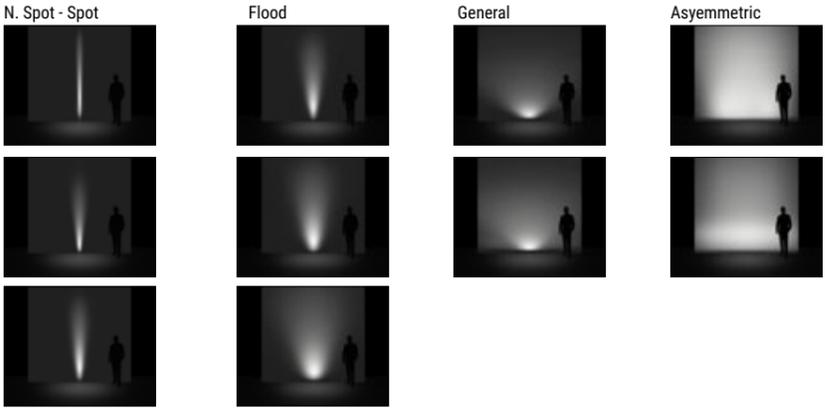

The Suelo family offers a variety of solutions for every design need: fixed and swivel versions, small-flanged semi-flush-mount uplights, and 0-10V dimming. There are pro models with recessed optics and RGBW sources, and beam control filters. All models have exclusive AquaStop® protection systems, and there are versions with 24-volt cable converters.

Suelo can be used with a honeycomb filter, which screens secondary light and reduces glare, maintaining a high-quality diffuse light. A darklight filter directs the illumination onto one part of the wall by sectioning one part of the beam, and prevents glare even close to the source. For full beam control and a drastically reduced glare risk, choose the Suelo PRO versions, in which the recessed source increases the screening angle, totally skimming off the secondary beam to give a cleaner, more concentrated and efficient light.

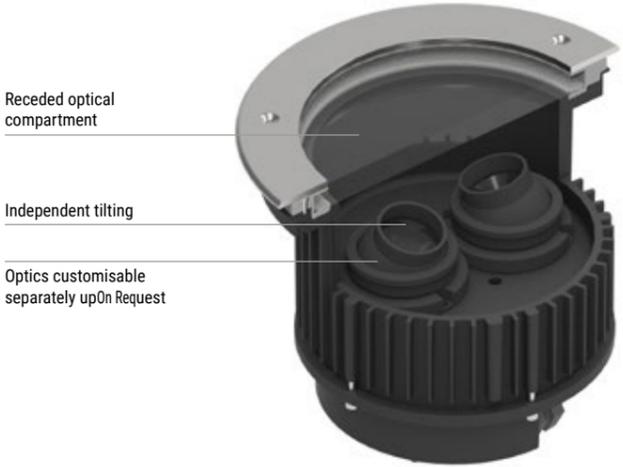

### Performance and control

There are several beam spreads to choose from, three color temperatures including warm light at 2700 and 3000K, and daylight at 4000K. The uniquely wide spectrum of optics includes an elliptic, some very narrow beams, some of them unique to the market, and an asymmetric wall washer for homogeneous and deep wash.
