STOANE LIGHTING

**IP66-rated catenary-mounted luminaire**

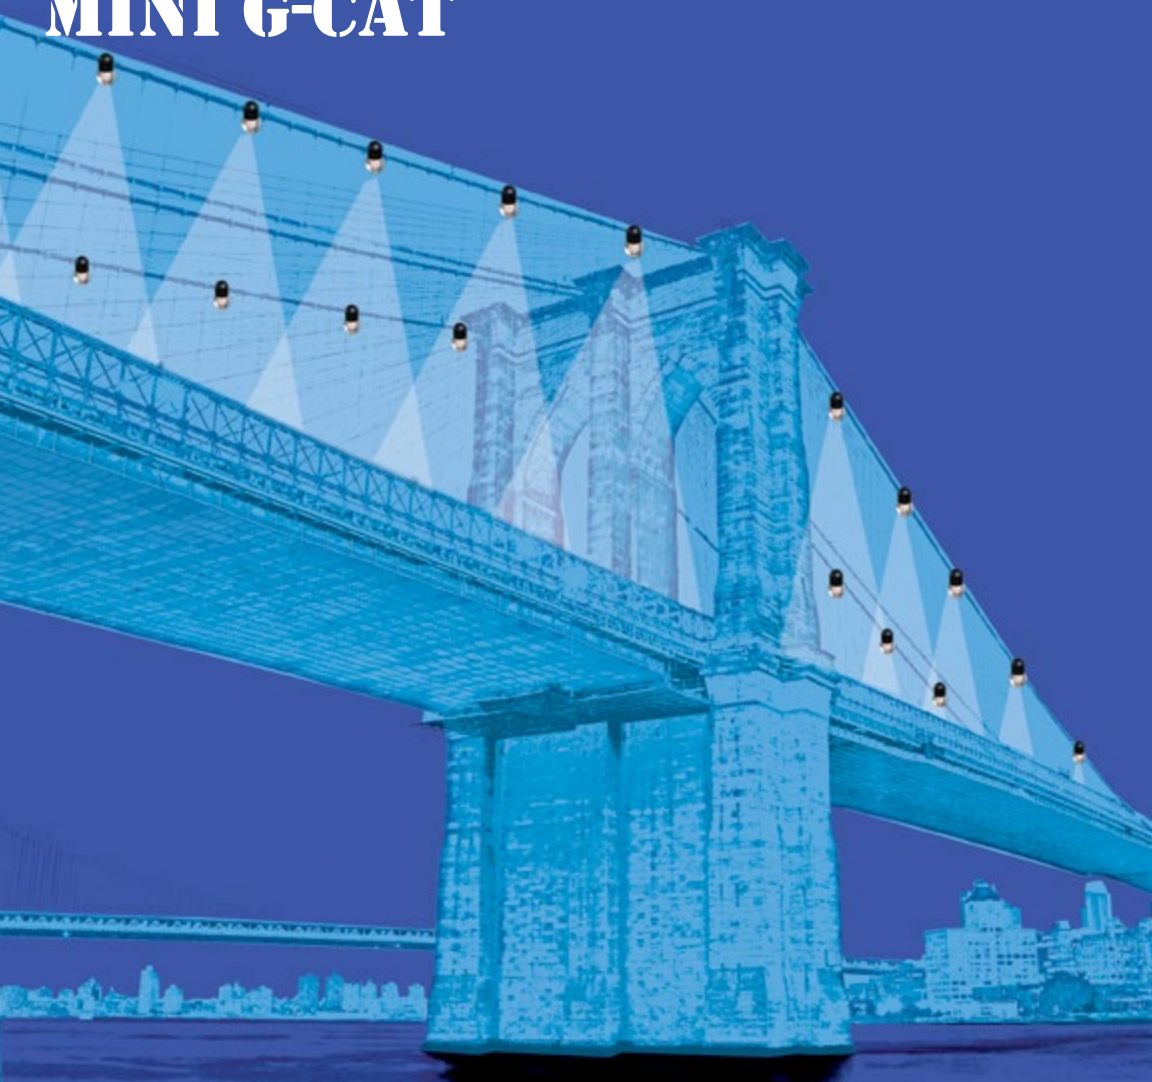

- Suitable for lighting outdoor public spaces, pathways and more intimate hospitality and high-end residential applications.
- Polished acrylic globe with internally-frosted diffuser provides general illumination.
- Configure cable runs with multiple luminaires to create a dramatic lighting environment.
- Precision machined from 70 - 90% recycled aluminum.
- Static white, LED 90+ CRI, multiple CCTs available.

# SKIN

linea  
light  
i-LED

**An innovative, versatile and modular outdoor (IP67) luminaire whose unusual elongated hexagonal shape facilitates the creation of continuous-linear compositions**

- The unusual elongated hexagonal shape facilitates the creation of continuous linear compositions.
- Straight or curved lighting patterns can be designed.
- SKIN is available in recessed and surface mounting for washing, grazing and accent applications.

# whitegoods

**Surface-mounted linear luminaire  
for glare-free indirect lighting  
and wayfinding**

- Standard and custom lengths to 96" in both indoor and outdoor versions.
- Static white, tunable white and RGBW LED sources for maximum functionality.
- Robust construction of extruded aluminum is solid yet clean-edged in appearance.
- Standard and custom finishes to blend in or stand out on any surface.
- Simple construction makes specification, installation and maintenance, easy.

**Minimalist, surface-mounted  
knife-edge luminaire for indirect  
and wall-wash applications**

- Both indoors and out, the wide and low-angle distribution allows WedgeCove to be placed closer to the surface being illuminated and further apart when using individual fixtures.
- Individual luminaires up to 96", or continuous to any specified length.
- Static white, tunable white and RGBW LED sources.
- Standard and custom finishes to blend in or stand out on any surface.
- Simple construction makes specification, installation and maintenance, easy.

**The only combination knife-edge cove  
with continuous-linear downlight**

- MEC delivers classic architectural indirect illumination on the ceiling with even, low-angle distribution. It illuminates the back of the cove and the ceiling directly above, with soft, redirected light.
- 20L integrated into the bottom of the MEC provides a comfortable, continuously-illuminated visual cue while contributing additional light levels to the floor and adjacent walls via its wide-angle distribution.
- Never before has a luminaire seamlessly integrated into drywall ceilings with such minimal visual interruption to the space, while delivering all the functional illuminance required.
