tools for lighting

Lighting is about creating an environment that uses light as the main medium of expression. It means having one's work blend seamlessly with the architecture, often at the risk of not being seen. It's about giving definition to a space.

Inter-lux has curated a collection of lighting products that represents the best in design. Inter-lux is sensitive to the demands of the market. We know exactly how you need your product: on time, on budget, and all backed up with only the very best in pre and post order service.

Inter-lux – tools for lighting

whitegoods

Whitegoods has developed a range of minimal lighting tools, utilizing the form factor of LED to reduce even further their visual impact.

Of course, they all hold true to our design principles:

- Reduction of detail
- Seamless architectural integration
- Logical, modular systems and families of products
- Ease of specification, installation and maintenance

whitegoods

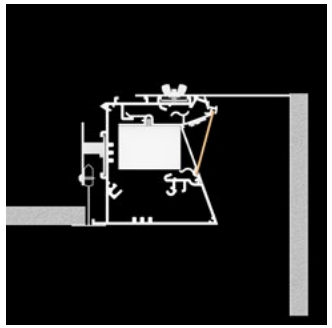
WedgeCove

Shallowest perimeter lighting system with integral driver that is compatible with all ceiling types. Continuous surface wall, ceiling or mullion-mounted cove system that delivers an even wash of directed light to the ceiling above, and redirected light to softly illuminate the wall behind the fixture.

BAA / BABA

Z Cove
Recessed Grid Trim

Shallowest perimeter lighting system with integral driver that is compatible with all ceiling types.



BAA / BABA

Mini Edgeless Cove + 20 Linear Direct

The only combination knife-edge cove with continuous-linear downlight.

BAA / BABA

City Linear

Surface-mounted linear luminaire for glare-free indirect lighting and wayfinding.

linea light i-LED

Linea Light is a global leader in high-performance lighting solutions, offering a diverse range of architectural, decorative, and technical fixtures for residential, commercial, and outdoor applications. With a commitment to innovation, sustainability, and cutting-edge LED technology, Linea Light delivers high-efficiency lighting designed to enhance any space. Known for its Italian craftsmanship and advanced engineering, the brand seamlessly blends aesthetics with functionality, making it a trusted choice for architects and designers worldwide.

Skin

Skin provides flexibility in illuminating most applications. From wall washing to evenly illuminating architectural curves like columns and curved walls, you will find a Skin for any need. Available as Ceiling, Wall and In-ground, with Surface, Recessed or Semi-Recessed mounting. With multiple beam spreads and an attention to how optical elements interact with the surrounding environment, Skin will draw attention to what matters the most while fully blending into the space.

Dirigo

A unique way to illuminate outdoor pathways with a minimal, yet robust linear lighting system designed to provide glare-free illumination to a path at night and disappear into the landscape during the day.

Now made in the USA.

Rubber

Rubber is a versatile family of flexible lighting fixtures designed for complex architectural applications, both indoors and outdoors. It offers multiple solutions: a 3D version with diffused light that bends in all directions, a slim 2D Mini (0.2" wide) for sideways bending, and the unique 3D Optic. The 3D Optic features dedicated optics every inch, delivering 360° bendability with exceptional performance and design.

Orma

Orma is a compact and shallow family of round LED in-grades suitable to illuminate outdoor architectural elements such as facades and columns as well as landscape and pathway lighting. The overall depth of roughly 3", including the housing, makes it one of the most compact fixtures on the market.

SATTLER

SATTLER pioneered the geometrically-shaped suspended luminaire that is so popular today. Providing functional illumination as well as feature aesthetics in a space, SATTLER quality is unmatched in the industry. SATTLER has expanded their offering to add more organic shapes, including some with biophilic and acoustic qualities.

STOANE LIGHTING

Stoane Lighting designs and manufactures the highest level of product. Utilizing quality materials, the latest appropriate technology and the most efficient design and engineering philosophy, Stoane Lighting products are produced in compliance with the most stringent environmental sensitivities.

Controlling all aspects of the process, Stoane Lighting can treat standard and custom luminaires in the same high-quality, environmentally-conscious manner, and with service life in mind.

If you are a lighting designer, do yourself a favor...

STOANE LIGHTING

G-CAT
Mini G-Cat

G-CAT and Mini G-Cat are versatile, decorative yet functional, robust catenary lighting systems. Varied optical accessories provide general illumination or accent lighting in any outdoor space. The tensioned cable system mounts to any structure and carries the electrical supply to single or multiple luminaires.

Using Stoane Lighting's capability to introduce custom adaptations, sparkling spheres and shadow-casting shades can be applied for unique results.

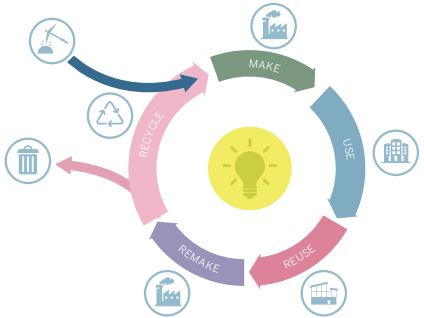
Mini G-Cat

STOANE LIGHTING

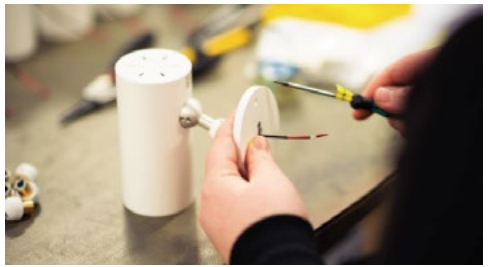
Circular Economy

Sustainable lighting for the circular economy. Stoane Lighting products are designed to be easily disassembled, so internal components can be replaced, upgraded and eventually recycled.



MODULAR Common components across multiple products

REPLACEABLE Upgradeable optics, light sources and drivers



REMANUFACTURABLE Light sources and optics

ECODESIGN Meet Ecodesign energy efficiency and performance thresholds

King's Awards for Enterprise

The King's Awards for Enterprise are awarded to businesses for outstanding achievement in four categories; International Trade, Innovation, Sustainable Development and Promoting Opportunity (through social mobility). They are the highest official UK awards for British businesses.

Stoane Lighting won not one, but two awards. First, in the Innovation category, specifically for ZTA and second, in the Sustainable Development category which recognizes their sustainable practices, leadership and commitment to driving positive change within the lighting industry.

Portable luminaires

Being drawn to the light is part of our very nature. But what would happen if light were to simply follow us? What if we could take a luminaire with us wherever we want to go? What if it could provide light that is both discreet and pleasant wherever we take it? Say hello to cherry bubbls, qua, glim, qu, fil, lix, lix mini, lix skinny and aqu!

Lix multi-charge base

Charges up to 6 lix skinnys or lix minis at the same time, or 6 lix fixtures with spacer.

Solar luminaires

They come into their own when the sun goes down. At the same time, they bring the energy of the golden orb into the dusk in the most flexible fashion: our solar luminaires can be positioned in next to no time, wherever atmospheric light is needed.
